

More Able and Talented

From the moment your child arrives at our College, we take the initiative to identify and track exceptional talents and abilities, allowing them to flourish and gain confidence from an early age. If your child has a particular talent or shows exceptional potential, this is recognised and encouraged. Your child is unique and we adapt our teaching to what is best for them.

Through our small class sizes, positive relationships and passion for bringing out the best in our pupils, our More Able and Talented programme is tailored to provide the highest level of support, guidance and encouragement to maximise the potential of your child.

We aspire to provide a rich, challenging and rewarding education for the most able. Stimulating pupils through varied and challenging curricular and co-curricular activities encouraging them to try new things and develop existing interests and skills allowing them to achieve their full potential.
